SEMINÁRIO DE ANÁLISE E EQUAÇÕES DIFERENCIAIS

Dia 21 de Fevereiro (quinta-feira), às 13h30, na sala 6.2.38

Convergence of asymptotic systems of non-autonomous Hopfield neural network models with infinite distributed delays

José Oliveira
(Universidade do Minho)

Abstract:
In this seminar, we present some results about the global convergence of solutions of non-autonomous Hopfield neural network models with discrete time-varying delays, infinite distributed delays, and possible unbounded coefficient functions.

In some situations, with these results it is possible to characterize the dynamic of a Hopfield neural network model studying the dynamic of one of its asymptotic models.

Some examples are presented to compare our results with the previous one in the literature.
